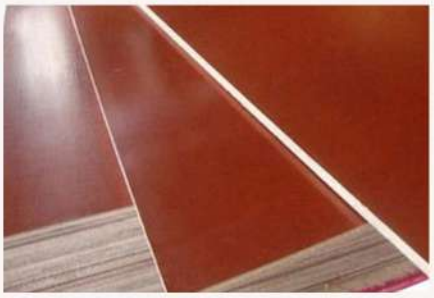
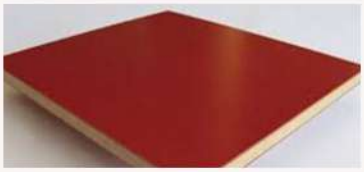
Shuttering Film Faced Plywood:

This plywood is manufactured with CGPL technology, which offers extra strength, great bonding and fine texture. RedFrame shuttering ply gives both quality as well as maximum repetition saving upto 50 percent of the cost. It works great for RCC constructions, bridges, flyovers, metro projects, water tanks, ship building, all high rise buildings, which need maximum strength for the foundation. There are varieties of high densified shuttering ply as per the projects.





12mm 8*4 25kg	12mm 8*4 30kg	12mm 8*4 34kg	18mm 8*4 45kg	18mm 8*4 50kg

Do's

- After Use, cleaning and oiling the surface increases the life of plywood.
- Use screws to fix shuttering plywood.
- Store it properly stacked under shed.
- Care should be taken during transport to avoid scratches.
- Should be recoated with mould oil before the next use.
- The edges of a board in pack shall be in a straight vertical line.

Don't

- Side screwing & nailing strictly prohibited.
- Don't use the material without suitable mould oil.
- Don't allow the material to fell down from top/certain height of the building.
- The plywood shall not be dragged over one another as this would scratch the surface.
- Don't allow the material to use without sealants at the cut edges.
- Don't allow the material to stack without proper drying.

Commercial Plywood & Block Boards:

RedFrame commercial plywood comes with variety of ranges like MR Grade, Alternate, BWP Grade. When its come to quality, RedFrame deliver quality products to make the most out of that, which reflects your offices, homes and infra for long run.

- Flexible and crack free plywood.

comfort

Composite & Wooden Pallets

RedFrame is a brand known for Composite and Wooden Pallets suppliers. A leading brand for the excellent quality of wooden pallets by using the raw material garnered from high class vendors. RedFrame offers wooden pallets which are fabricated in wooden sheets. We uses top grade timber along with highly advance technology to manufacture these wooden pallets.

Our wooden pallets have weather resistant characteristics and highly sturdy in nature. These pallets are durable and are tested chemically for serving the better protection from termites and worms. These are designed to carry and manage heavy weights with high tensile strength. These are cost effective as well.

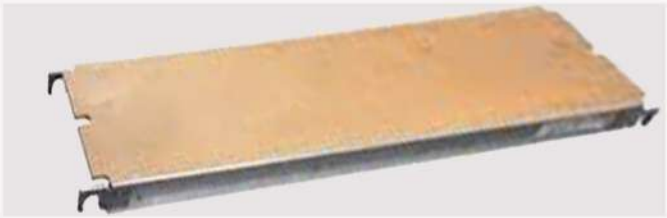
Features:

- Provides burn free surface.
- These LVL are termite free.
- High load bearing capacity.
- Consists premium quality wood.

Scaffolding Planks

One of the best product under RedFrame umbrella is Scaffolding Planks. These Scaffolding Planks are available in various range of scheme, made with multiple material options. These Scaffoldings are made by our expert team of trained and professional engineers who is making this product with the intensive innovative approach and technological inventions and advancements. These planks are capable of bearing the heavy loads easily. We have availability of various dimensions of scaffolding planks as per the client's requirement.

As their application is wide so these planks are also made durable and resistive to various kinds of weather hazards or breakdowns. Our planks provide the safer work area for the customer's scaffold system. These planks are used either with the supported or suspended scaffold systems. We offer these planks at reasonable nominal rates.



Features:

- The planks are made with the best material.
- These are designed to bear the heavy loads.
- We have the availability of different dimensions of scaffold planks.
- These floorings provides better grip while using.
- We offer these planks at nominal rates.
- These planks are made with fabrication to give them more strength and finish.

creative

Fire Retardant Plywood

One of our most amazing product is Fire Retardant Plywood. RedFrame is recognized brand for supplying Fire Retardant Plywood by using the superior quality of raw materials sourced from top class vendors. Our product has passed enormous test and certain chemicals under vacuum pressure impregnation for fire resistant quality.With fine seasoned hardwood and great finish, out product holds a name in the market.Ultra rich laminates are being used to bring on the shine and smooth surface finish on the plywood material.

This plywood has become essential in homes or in the office to decorate the interiors with the fascinating work with lustrous shine and vivid patterns. The plywood is manufactured by our team of expert and trained professionals. This plywood is available with inflammable ability in large panels. The large panels help in reducing the cost and save time in joining the small pieces while construction.

Features:

- Water proof and weather resistant.
- Termite resistant hardwood.
- Fire resistant and are well tested with chemicals under vacuum pressure impregnation.
- We ensure the resistance to the immediate ignition and flame penetration.
- These are easy to carry, store and fix.

Container Flooring

RedFrame offer Container flooring material with superior quality of raw material to manufacture the best Container Flooring. These container floorings are made to bring in a new style to your interiors. Our Container floorings which will help in decorating the homes and offices of our clients with its beautiful appearance. These container floorings are made with the selected hardwood veneers sourced from an exclusive vendor in the market.

We are producing the container floorings with high durability. These are used in transport systems as well so these are tough enough to break down due to heavy loads of goods and especially during loading and unloading the containers. These container floors are used in heavy load carrying vehicles which require high strength durability material. These flooring is produced basically in 28mm of thickness. These container flooring is available in variant sizes from 2440* 1200mm till 3220* 1675mm. We use the best quality of adhesives of BWP Grade.

Features:

- The various dimensions of container flooring is available.
- These are easy to carry, store and fix.
- These floorings are made from the selected hardwood.
- These floorings provides better grip while using.
- We test the strength of these floorings as these are made especially for the purposes where load handling is more.
- These floorings provides better grip while using.

Flush Door

RedFrame Flush door are excellent resistant against dust, heat and noise. It is a completely smooth door with plywood or Medium Density Fibreboard (MDF) fixed over a light timber frame and the hollow parts of its filled with a cardboard core material. Flush doors are simple interior and exterior doors that feature plain facings on both sides of the construction.

The flush door is mainly constructed by using two sections of plywood that are attached to each side of a frame. The interior of the door is hollow, that is been supported for making frame and majorly honeycomb support system is used. Good for exterior doors as they provide more insulation and strength.

- Solid Core Flush Doors
- Hollow Core Flush Doors
- Cellular Core Flush Doors

Features:

- The various dimensions of container flooring is available.
- These are easy to carry, store and fix.
- These floorings are made from the selected hardwood.

strong
